

LB_ Assignment -2 / Solution

1 Grade Evaluation System

```
class GradeEvaluation{  
    public static void main(String[] args) {  
        int Maths = 20;  
        int Science = 85;  
        int History = 10;  
        int AvgMarks = (Maths+Science+History)/3;  
        System.out.println(AvgMarks);  
        if (AvgMarks >= 90) {  
            System.out.println("Grade A");  
        } else if (89 <= AvgMarks && AvgMarks >= 70) {  
            System.out.println("Grade B");  
        } else if (69 <= AvgMarks && AvgMarks >= 50) {  
            System.out.println("Grade C");  
        } else if (49 <= AvgMarks && AvgMarks >= 30) {  
            System.out.println("Grade D");  
        } else{  
            System.out.println("Fail");  
        }  
    }  
}
```

2 Leap Year

```
public class LeapYear {  
    public static void main(String[] args) {  
        int y = 1900;  
        if ((y%4 == 0 && y%100 != 0) || y%400 == 0) {  
            System.out.println(y+" is leap year");  
        }else{ System.out.println(y+" not a leap year");  
        }  
    }  
}
```

3 Days Of The Week

```
public class DaysOfTheWeek {  
    public static void main(String[] args) {  
        int Day = 3;  
  
        switch (Day) {  
            case 1:  
                System.out.println("Day is Monday");  
                break;
```

case 2:

```
System.out.println("Day is Tuesday");
```

```
break;
```

case 3:

```
System.out.println("Day is Wednesday");
```

```
break;
```

case 4:

```
System.out.println("Day is Thursday");
```

```
break;
```

case 5:

```
System.out.println("Day is Friday");
```

```
break;
```

case 6:

```
System.out.println("Day is Saturday");
```

```
break;
```

case 7:

```
System.out.println("Day is Sunday");
```

```
break;
```

default:

```
System.out.println("Invalid Number");
```

```
}
```

```
}
```

```
}
```

4. Identify the values of uninitialized variable

```
public class IdentifyValues {  
    public static void main(String[] args) {  
        byte a; // Local variables must be initialized  
        short b; //Local variables must be initialized  
        int c; //Local variables must be initialized  
        long d; // .....  
        float e; // .....  
        double f; // .....  
        char g; //.....  
        boolean h; //.....  
        // System.out.println(h); compile time error  
    }  
}
```
